Q2: How do you create a formula in Excel 2010 to sum a range of cells? Answer: To create a sum formula: Click on the cell where the result should appear. Type `=SUM(range)` where "range" is the cell range, e.g., `A1:A10`. Press

Proper use of referencing ensures accurate calculations when copying formulas across the worksheet.

Microsoft PowerPoint 2010

Q1: What is a slide master, and why is it important?

Answer: The slide master is a top-level slide that controls the overall design, layout, and formatting of all slides in a presentation. This feature streamlines consistent formatting and saves time during presentation design.

Q2: How can you add animations to text or objects?

Answer: To add animations: Select the text box or object. Go to the Animations tab. Choose an animation effect from the options. Customize the effect using the Animation Pane. Animations help emphasize key points and make presentations more engaging.

Q3: What are slide transitions, and how are they different from animations?
